AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

- Claim 1. (Previously Presented) A tampon for feminine hygiene comprising an insertion end, a withdrawal end, a longitudinal axis, and an outer surface; said tampon being comprised of compressed fibrous material; wherein said outer surface of said tampon comprises a plurality of first surfaces and a plurality of second surfaces, each of said first surfaces having a distal end and a proximal end, each of said second surfaces having a distal end and a proximal end, said proximal end of said first surface contacting said proximal end of said second surface to form a proximal vertex, said distal end of said first surface contacting said distal end of said second surface to form a distal vertex, wherein along the length of the tampon there are multiple widths between a first distal vertex and a second distal vertex, wherein the multiple widths have a stepped transition.
- Claim 2. (Original) The tampon according to Claim 1 wherein at least a portion of said distal vertexes are parallel with said longitudinal axis.
- Claim 3. (Original) The tampon according to Claim 1 wherein at least a portion of said distal vertexes are spirally shaped.
- Claim 4. (Cancelled)
- Claim 5. (Original) The tampon according to Claim 1 wherein the fibrous material of said tampon has an essentially uniform density over a cross section of the tampon.
- Claim 6. (Original) The tampon according to Claim 1 wherein the fibrous material of said tampon has varying density over a cross-section of the tampon.

Customer No. 27752

- Claim 7. (Original) The tampon according to Claim 1 wherein said tampon further comprises a core which is highly compressed.
- Claim 8. (Original) The tampon according to Claim 1 wherein said withdrawal end further comprises a withdrawal member.
- Claim 9. (Original) The tampon according to Claim 1 wherein said withdrawal end further comprises a finger indent.
- Claim 10. (Previously Presented) A tampon for feminine hygiene comprising an insertion end, a withdrawal end, a horizontal axis, a longitudinal axis, a radial axis, and an outer surface;
said tampon being comprised of compressed fibrous material;
wherein said outer surface of said tampon comprises a plurality of first surfaces and a plurality of second surfaces, each of said first surfaces having a distal end and a proximal end, each of said second surfaces having a distal end and a proximal end, said proximal end of said first surface contacting said proximal end of said second surface to form a proximal vertex, said distal end of said first surface contacting said distal end of said second surface to form a distal vertex, wherein along the length of the tampon there are multiple widths between a first distal vertex and a second distal vertex, wherein the multiple widths have a stepped transition.
- Claim 11. (Original) The tampon according to Claim 10 wherein at least a portion of said distal vertexes are parallel with said longitudinal axis.
- Claim 12. (Original) The tampon according to Claim 10 wherein at least a portion of said distal vertexes are parallel with said horizontal axis.
- Claim 13. (Original) The tampon according to Claim 10 wherein at least a portion of said distal vertexes are spirally shaped.
- Claim 14. (Cancelled)

Customer No. 27752

- Claim 15. (Original) The tampon according to Claim 10 wherein the fibrous material of said tampon has an essentially uniform density over a cross section of the tampon.
- Claim 16. (Original) The tampon according to Claim 10 wherein the fibrous material of said tampon has varying density over a cross-section of the tampon.
- Claim 17. (Original) The tampon according to Claim 10 wherein said tampon further comprises a core which is highly compressed.
- Claim 18. (Original) The tampon according to Claim 10 wherein said withdrawal end further comprises a withdrawal member.
- Claim 19. (Original) The tampon according to Claim 10 wherein said withdrawal end further comprises a finger indent.
